

GT EESTI

About

GT Eesti is a free-spirited interpretation of the Soviet geometric sans serif “Zhurnalnaya Roublennaya”. Starting with books from Soviet-occupied Estonia, we developed the typeface to suit today’s designers’ requirements, expanding it into separate Display and Text subfamilies for both Latin & Cyrillic.

Background

In 2009, Swiss designer Urs Lehni introduced Reto Moser to a typeface he found in an Estonian children's books from the '60s. Reto then began to digitize the book's typeface together with Tobias Rechsteiner. It soon became apparent that the typeface consisted of two different styles: one suited for smaller sizes, and another for larger use.

To understand the origins of the typeface Grilli Type travelled to Estonia, where we met Ivar Sack, the country's foremost design and typography historian. He provided us with deeper insight into the typeface, which turned out to be "Zhurnalnaya Roublennaya" — a Soviet design from 1947. At that point we discovered the Cyrillic character set, and began integrating it into the existing Latin-alphabet typeface designs.

GT Eesti aims to bring the charm of the original back to life while offering a complex and contemporary type family well-suited for modern usage.

Grilli Type

Concept

GT Eesti Text

GT Eesti Display

Overall

The Text styles are spaced wider and sport large ink traps, creating more dynamic shapes. These features help make the typeface more legible in smaller sizes.

The Display subfamily is more static in nature, and lacks ink traps. It is the ideal partner to the Text version for use in larger sizes, but of course, it can also stand on its own.

Proportions

The Text subfamily has slightly smaller counters, a feature which gives the typeface a more forward-leaning movement when reading longer text.

Color

The ink traps and the strong tapering in the Text version prevent ink and pixel bleeding, preventing spotty text color in small sizes.

Dynamic

Diagonal cuts open the apertures in the Text version, giving the typeface a more playful and open character.

Ascender

The GT Eesti-Text subfamily's ascender height is greater than that of the Display's. This increases legibility due to visual uniformity, but gets less visible at smaller sizes.

Style

GT Eesti Text

GT Eesti Display

Vertical tips

The Text styles have pointed apices, a historical reference to the PhotoType version of "Zhurnalnaya Roublennaya".

AVM

AVM

Stroke endings

The Display subfamily has mostly 90° stroke endings, with the Text version having more playful variations, for a more dynamic character.

Z&7

Z&7

Numbers

The numerals, as well as some of the currency signs, vary in both subfamilies, respective to the overall style of their design.

135£

135£

Alternate Designs

While some characters are nearly identical in the two families, others differ strongly.

About GrilliType

Grilli Type is an independent Swiss type foundry. We offer original retail and custom typefaces, high quality products with a contemporary aesthetic in the Swiss tradition. This tradition is reflected in the visual but also the technical standard of our fonts and our service. Together with our designers we create useful, high quality typefaces that stand the test of time.

Taasvallutatud Eestis kehtestati uuesti nõukogude võim. Siiski jätkasid paljud metsavennad võitlust metsades. Nõukogude võim võitles metsavendade vastu nende peamiste toetajate, talupoegkonna küüditamistega. 25.-29. märtsil 1949 toimus teine massiline küüditamine – märtsiküüditamine, mille käigus saatsid Nõukogude okupatsioonivõimud Eestist loomavagunites Venemaale – Krasnojarski kraisse, Novosibirski, Tomski.

8 pt

In 1989, during the 'Singing Revolution', in a landmark demonstration for more independence, more than two million people formed a human chain stretching through Lithuania, Latvia and Estonia, called the Baltic Way. All three nations had similar experiences of occupation and similar aspirations for regaining independence. The Estonian Sovereignty Declaration was issued on 16 November 1988. On 20 August 1991, Estonia declared formal independence during a Soviet military coup attempt in Moscow, reconstituting the pre-1940 state. The Soviet Union recognised the independence.

6 pt
OT SS01

The Republic of Estonia is divided into fifteen counties (Maakonnad), which are the administrative subdivisions of the country. The first documented reference to Estonian political and administrative subdivisions comes from the Chronicle of Henry of Livonia, written in the thirteenth century during the Northern Crusades.

A maakond (county) is the biggest administrative subdivision. The county government (Maavalitsus) of each county is led by a county governor (Maavanem), who represents the national government at the regional level. Governors are appointed by the

Government of Estonia for a term of five years. Several changes were made to the borders of counties after Estonia became independent, most notably the formation of Valga County (from parts of Võru, Tartu and Viljandi counties) and Petseri County (area acquired from Russia with the 1920 Tartu Peace Treaty).

During the Soviet rule, Petseri County was annexed and ceded to the Russian SFSR in 1945 where it became Pechorsky District of Pskov Oblast. Counties were again re-established on 1 January 1990 in the borders of the Soviet-era districts. Because of the numerous

differences between the current and historical (pre-1940, and sometimes pre-1918) layouts, the historical borders are still used in ethnology, representing cultural and linguistic differences better.

Estonia is divided into fifteen counties (maakond). Each county is further divided into municipalities (omavalitsus), which is also the smallest administrative subdivision of Estonia. There are two types of municipalities: an urban municipality – linn (town), and a rural municipality – vald (parish). There is no other status distinction between them.

6 pt
OT SS01

Estonia is nearly energy independent, supplying over 90% of its electricity needs with locally mined oil shale. Alternative energy sources such as wood, peat, and biomass make up approximately 9% of primary energy production. Estonia imports needed petroleum products from western Europe and Russia. Oil shale energy, telecommunications, textiles, chemical products, banking, services, food and fishing, timber, shipbuilding, electronics, and transportation are key sectors of the economy. The ice-free port of Muuga, near Tallinn, is a modern facility featuring good transshipment capability, a

high-capacity grain elevator, chill/frozen storage, and brand-new oil tanker off-loading capabilities. The railroad serves as a conduit between the West, Russia, and other points to the East.

After a long period of very high growth of GDP, the GDP of Estonia decreased by a little over 3% on a yearly basis in the 3rd quarter of 2008. In the 4th quarter of 2008 the negative growth was already -9.4%. Some[who?] international experts and journalists, who like to view the three Baltic states as a single economic identity, have failed to notice that Estonia has constantly performed better

than Lithuania and Latvia on many fundamental indicators.[citation needed] Still, in 2009 Estonia was one of the five worst performing economies in the world in terms of annual GDP growth rate. [22] The current account deficit and inflation is lower than in Latvia, the GDP per capita is higher than in Latvia and Lithuania, Estonia's public debt is a very low 3.8% of GDP and government reserves are close to 10% of GDP. The difference is exemplified by the fact that in December 2008 Estonia became one of the donor countries to the IMF lead rescue package for Latvia.

Text Book & Book Italic30 pt
OT SS01

The USSR's annexation of Estonia in 1940 with the ensuing Nazi and Soviet destruction during World War II crippled the Estonian economy. Post-war Sovietization of life continued with the integration of Estonia's economy and industry into the USSR.

Text Book & Book Italic

20 pt

After Estonia moved away from Communism during the late 1980s and became an independent capitalist economy in 1991, it emerged as a pioneer of the global economy. In 1994, it became one of the first countries in the world to adopt a flat tax, with a uniform rate of 26% regardless of personal income.

15 pt

Estonia received more foreign investment per capita in the second half of the 1990s than any other country in Central and Eastern Europe. The country has been quickly catching up with the EU-15, its GDP per capita having grown from 34.8% of the EU-15 average in 1996 to 65% in 2007, similar to that of Central European countries. It is already rated a high-income country.

Text Book & Book Italic

12 pt
OT SS01

Since reestablishing independence, Estonia has styled itself as the gateway between East and West and aggressively pursued economic reform and integration with the West. Estonia's market reforms put it among the economic leaders in the former COMECON area. A balanced budget, almost non-existent public debt, flat-rate income tax, free trade regime, fully convertible currency backed by currency board and a strong peg to the euro, competitive commercial banking sector, hospitable environment for foreign investment, innovative e-Services and even mobile-based services are all hallmarks of Estonia's free-market-based economy. Estonia also has made excellent progress in regard to structural adjustment.

In June 1992, Estonia replaced the ruble with its own freely convertible currency, the kroon (EEK). A currency board was created and the new currency was pegged to the German Mark at the rate of 8 Estonian kroons for 1 Deutsche Mark. When Germany introduced the euro the peg was changed to 15.6466 kroons for 1 euro. Estonia was set to adopt the euro in 2008 but due to high inflation rates the adoption date was delayed to 2011. On 1 January 2011, Estonia adopted the euro and became the 17th eurozone member state. The privatization of state-owned firms is virtually complete, with only the port and the main power plants.

Text Book & Book Italic

9 pt

Estonian economy was one of the fastest growing in the world until 2006 with growth rates even exceeding 10% annually. Despite some concerns both in and outside of the country, the Estonian economy and its currency remained highly resilient and solvent.

Until recent years, the Estonian economy has continued to grow with admirable rates. Estonian GDP grew by 6.4% in the year 2000 and with double digit speeds after accession to the EU in 2004. The GDP grew by 7.9% in 2007 alone. Increases in labor costs, rise of taxation on tobacco, alcohol, electricity, fuel, and gas, and also external pressures (growing prices of oil and food on

the global market) are expected to raise inflation just above the 10% mark in the first months of 2009.

In the first quarter 2008, GDP grew only 0.1%. The government made a supplementary negative budget, which was passed by the Riigikogu. The revenue of the budget was decreased for 2008 by EEK 6.1 billion and the expenditure by EEK 3.2 billion. Estonia joined the World Trade Organization in 1999. A sizable current account deficits remains, but started to shrink in the last months of 2008 and is expected to do so in the near future. In the second quarter of 2013, the average monthly gross wage in Estonia was €976 (15,271 kroons, US\$1,328).

6 pt

After a long period of very high growth of GDP, the GDP of Estonia decreased by a little over 3% on a yearly basis in the 3rd quarter of 2008. In the 4th quarter of 2008 the negative growth was already -9.4%. Some[who?] international experts and journalists, who like to view the three Baltic states as a single economic identity, have failed to notice that Estonia has constantly performed better than Lithuania and Latvia on many fundamental indicators. [citation needed] Still, in 2009 Estonia was one of the five worst performing economies in the world in terms of annual GDP growth rate.[22] The current ac-

count deficit and inflation is lower than in Latvia, the GDP per capita is higher than in Latvia and Lithuania, Estonia's public debt is a very low 3.8% of GDP and government reserves are close to 10% of GDP. The difference is exemplified by the fact that in December 2008 Estonia became one of the donor countries to the IMF lead rescue package for Latvia.

Estonia today is mainly influenced by developments in Finland, Russia, Sweden and Germany – the four main trade partners. The government recently greatly increased its spending on innovation. The prime minister from the Estonian Reform Party has stated its goal of bringing Estonian GDP per capita into the top 5 of the EU by 2022. However, the GDP.

Maakond является крупнейшим административным подразделением. Правительство графства каждого округа во главе с губернатором округа, который представляет национальное правительство на региональном уровне. Губернаторы назначаются правительством Эстонии сроком на пять лет. Некоторые изменения были внесены в границах округов после Эстония стала независимой, особенно формирование Валгамаа (из частей Выру, Тарту и Вильянди округов) и Печорского уезда (района получил от России мирного договора в Тарту в 1920 году).

Во время советской власти, Печоры округа была присоединена и уступила РСФСР в 1945 году, где он стал Печорский район Псковской области. Округа были снова восстановлены с 1 января 1990 года в границах советских районов. Из-за многочисленных разногласий между текущей и исторической, до 1940 года.

Because of the global economic recession that began in 2007, the GDP of Estonia decreased by 1.4% in the 2nd quarter of 2008, over 3% in the 3rd quarter of 2008, and over 9% in the 4th quarter of 2008. The Estonian government made a supplementary negative budget, which was passed by Riigikogu. The revenue of the budget was decreased for 2008 by EEK 6.1 billion and the expenditure by EEK 3.2 billion. In 2010, the economic situation stabilised and started a growth based on strong exports. In the fourth quarter of 2010, Estonian industrial output increased by 23% compared to the year before. According to Eurostat data, Estonian PPS GDP per capita stood at 67% of the EU average in 2008.

10 pt

Estonia produces about 75% of its consumed electricity. In 2011 about 85% of it was generated with locally mined oil shale. Alternative energy sources such as wood, peat, and biomass make up approximately 9% of primary energy production. Renewable wind energy was about 6% of total consumption in 2009. Estonia imports petroleum products from western Europe and Russia. Oil shale energy, telecommunications, textiles, chemical products, banking, services, food and fishing, timber, shipbuilding, electronics, and transportation are key sectors of the economy. The ice-free port of Muuga, near Tallinn, is a modern facility featuring good transshipment capability, a high-capacity grain elevator, chill/frozen storage, and new oil tanker off-loading capabilities. [citation needed] The railroad serves as a conduit.

15 pt

Estonia has over 1,500 islands. The nature is essentially untouched and offers quite a different beach experience with their remoter rustic feel. Most of the public beaches are sandy and the average water temperature is 18°C in summer. Inland waters and some shallow bays' waters are warmer.

The largest island is Saaremaa with an intact and well-restored medieval castle in its only city, Kuressaare. Stone fences, thatched roofs, working windmills and home made beer are all distinctive to Saaremaa. Hiiumaa, on the other hand, is well known for its lighthouses, unspoilt nature, the Hill of Crosses and the sense of humour of its inhabitants. Both islands have an airport so they can be quickly reached from Tallinn.

Other important islands include Kihnu, Ruhnu (with its 'singing sand' beach), Muhu and Vormsi, each with its own unique characteristics. Most of the other tiny Estonian islands don't carry much significance.

Kuna ülemaailmne majandussurutis, mis algas 2007. aastal, Eesti SKP vähenes 1,4% 2008. aasta 2. kvartalis üle 3% 2008. aasta 3. kvartalis ning üle 9% aasta 4. kvartalis 2008. Eesti valitsus tehtud täiendava negatiivse eelarve, mis võeti Riigikogus. Tulude eelarve vähenes 2008. aastal 6,1 miljardit krooni ja kulude 3,2 miljardit krooni. Aastal 2010, majanduslik olukord stabiliseerus ja hakkas majanduskasv põhineb tugeva ekspordil. Neljandas kvartalis 2010, Eesti kasvas tööstustoodang 23% võrreldes eelmise aastaga. Eurostati andmetel on Eesti PPS SKP per capita oli 67% ELi keskmisest 2008.

10 pt

As a member of the European Union, Estonia is considered a high-income economy by the World Bank. The GDP (PPP) per capita of the country, a good indicator of wealth, was in 2013 \$23,144 according to the IMF, between that of Slovak Republic and Latvia, but below that of other long-time EU members such as Greece or Spain. The country is ranked 11th in the 2014 Index of Economic Freedom, and the 4th freest economy in Europe. Because of its rapid growth, Estonia has often been described as a Baltic Tiger be-

side Lithuania and Latvia. Beginning 1 January 2011, Estonia adopted the euro and became the 17th eurozone member state.

According to Eurostat, Estonia had the lowest ratio of government debt to GDP among EU countries at 6.7% at the end of 2010. The world media has lately started to describe Estonia as a Nordic country, emphasising the economic, political and cultural differences between Estonia and its less successful Baltic neighbours. A balanced budget, almost non-existent public debt, flat-rate income.

In the fourth quarter of 2010, industrial production in Estonia increased by 23% compared to the previous year.

10 pt

The Government of Estonia or the executive branch is formed by the Prime Minister of Estonia, nominated by the president and approved by the parliament. The government exercises executive power pursuant to the Constitution of Estonia and the laws of the Republic of Estonia and consists of twelve ministers, including the prime minister. The prime minister also has the right to appoint other ministers and assign them a subject to deal with. These are ministers without portfolio—they don't have a ministry to control.

The prime minister has the right to appoint a maximum of three such ministers, as the limit of ministers in one government is fifteen. It is also known as the cabinet. The cabinet carries out the country's domestic and foreign policy, shaped by parliament; it directs and co-ordinates the work of government institutions and bears full responsibility for everything occurring within the authority of executive power. The government, headed by the prime minister, thus represents the political leadership of the country.
